## **Centrifuges. LZ-Series**

"We apply consequently reuse and recycling of water. The water extraction technology of our centrifuges is friendly to the environment, to your budget and to the textiles."

Lavatec Laundry Technology GmbH

# Product Information.

## Centrifuges. LZ-Series

### Centrifuges

LZ 281	35 kg
LZ 285	60 kg
LZ 286 S	60 kg
LZ 290 S	90 kg / 100 kg

### Advantages:

Also delicate textiles will be drained gently and efficiently by the programmable centrifuges. The sturdy centrifuges will run smoothly even with heavy and stiff textiles. Strong pumps and filters will provide the recycling of the water. High driving speed and easy-to-handle loading and unloading will allow very short cycle times. This makes the centrifuges an ideal completion for large washing machines.

### Highlights:

- Energy saving through drive propulsion recovery
- High end internal lining of the drums is gentle to the fabric and eases the removal of laundry from the drum
- Discharge axial, left or right possible
- Easy programming
